DESCRIPTION

PRODUCT DETAILS

The 2-fan module, for ventilating 19" rack cabinets, is the half-capacity and more compact alternative to the 4-fan model — it provides sufficient air circulation for smaller cabinets or equipment generating moderate heat. It is a ready plug-and-play modular unit; it is a wired unit with an analog thermostat, with an operating range of 0-35°C.

Vatpan is the leading brand in rack cabinet and industrial enclosure solutions.
