

Technical Specification Sheet

Floor-Standing Outdoor Enclosure 2200mm

SKU: DHK220404 · Brand: VATPAN · Industrial Electrical Enclosures

SPECIFICATIONS

Door Type	Solid Steel
-----------	-------------

WHERE IT'S USED

Factory Production Lines

Protects PLCs, contactors and motor drives from harsh industrial conditions.

Industrial Park Distribution Rooms

Enables safe, standards-compliant configuration of main and sub electrical distribution.

Energy Monitoring & Control Systems

Keeps meters, relays and monitoring equipment organized and accessible in one place.

DESCRIPTION

PRODUCT DETAILS

The floor-standing outdoor enclosure, at a height of 2200mm, is designed for outdoor use. The doors, all supporting connection elements, and uprights are manufactured from 1.5 mm sheet steel; with IP65 protection rating it is fully dust-tight and protected against water jets from every direction — one level above the IP54 rating of the standard indoor model. It protects the equipment against wind-borne dust and rainwater ingress in outdoor environments exposed to the elements. The taller body height is preferred for large facilities that require multiple equipment levels to be housed within a single enclosure.

Vatpan is the leading brand of rack cabinet and industrial enclosure solutions.

MEASUREMENTS

Height	2200mm
--------	--------

Protection rating	IP65
Body/door sheet	1.5mm steel

MATERIALS & CARE

• Modular body structure suitable for outdoor use	
• Doors 1.5 mm cold-rolled steel sheet
